Key assumptions

- **Revenue and EBITDA⁽¹⁾** ahead of original target thanks to:
 - **Strong underlying performance** across both BU and key growth platforms
 - **Marginally positive** year on year **FX**, with USD and RUB strength offset by TRY devaluation
 - **Proactive actions to sustain margins**
- **EBITDA⁽¹⁾ margin of 36%** reflects **roughly -0.7%** dilutive effect of TRY **hyperinflation** (expected impact of +€15 million on Revenue and -€8 million on EBITDA), targeted incremental investments in Q4 behind growth drivers and phasing of R&D related payments
- **Financial expenses** now expected at around **€60 million**, due to enduring strength of RUB (limited recovery of 1H FX losses), with €10 million of net monetary losses from IAS 29
- **Adjusted Net Income⁽²⁾** expected in middle of target range, with higher operating results offset by higher financial expenses
- Guidance for **non-recurring costs** and charges from Purchase Price Allocation of EUSA acquisition unchanged vs Q2 estimates

1) Net income before income taxes, financial income and expenses, depreciation, amortization and write-downs of property, plant and equipment, intangible assets and goodwill, non-recurring items and non-cash charges arising from the allocation of the purchase price of EUSA Pharma to the gross margin of acquired inventory (IFRS 3)

2) Net income excluding amortization and write-downs of intangible assets (except software) and goodwill, non-recurring items, non-cash charges arising from the allocation of the purchase price of EUSA Pharma to the gross margin of acquired inventory (IFRS 3) and monetary net gains/losses from hyperinflation (IAS 29), net of tax effects
